Deliverable D1.7
Set-up of pilot plant for treatment of the typologies of building waste to be mixed to geopolymer materials and pilot production

Grant Agreement number 723916
Project acronym InnoWEE
Project full title INNOvative pre-fabricated components including different Waste construction materials reducing building Energy and minimising Environmental impacts
Due date of deliverable 30/09/2017
Lead beneficiary ECO
Other authors CNR-ICMATE

Publishable summary

The Deliverable D1.7 “Set-up of pilot plant for treatment of the typologies of building waste to be mixed to geopolymer materials and pilot production” presents the modifications to the separation line and the processing of CDWs (Construction and Demolition Waste) that ECO will perform to produce the SRM (Secondary Raw Material) most suitable for the InnoWEE project. The layout of the waste treatment plant will be partly redefined to suit the new procedure that envisages a new hammer mill rented on purpose, and to comply with the EoW criteria specifically set by Italian Local Authorities.
